MINING, BUSINESS AND STOCKS

PRESIDENT OF THE BINGHAM CON.

Executive Head of the Big Mining Corporation Arrives on An Inspection Trip.

COINC TO MEXICO FROM HERE.

Recently Acquired Interests in the State of Durango-Pleasing Message from the South.

President E. L. White of the Bingnam Consolidated made his appearance at the local offices of that company again this morning having come direct from Boston. After spending several days here in inspecting the mines and reduction works of his company will proceed on his way to Mexico, where he recently secured what appears to be a valuable mine.

The property is located in the state of Durango and while it is a long distance from the railroad at the present time—about 60 miles, it has enough merit to justfy the installation at an early date some quite extensive equipment.

During the day Mr. White received message from the south informing him that a vein of ore had been en-countered since last report which as-says \$800 to the ton. Naturally the says \$800 to the ton. Naturally the visitor is much gratified, over the good reports. A New York syndicate has recently secured a large concession of timber lands from the government of Mexico and proposes to build a railroad to it. If this is done, Mr. White says, the mines he proposes to equip and de-velop will be of easy access.

FORENOON ON 'CHANGE.

Stock Market Extremely Dull and Prices Generally Lower.

The usual quiet prevailed on the floor of the Mining Exchange this morning. The market was weak and nearly every thing was quoted down. Consolidated Mercur suffered another serious set-back and sold down to 20 cents, while the closing bid was marked up at 1914 cents. While none of the Daly stocks were brought out, they were all weaker. Daly-West was offered at \$23, but no one would bid above \$22.25 for the stock. Grand Central was not wanted and nothing like the market price was bid for it. Tetro held about even, while Silver Shield closed lower.

The closing quotations and sales were posted as follows: TODAY'S QUOTATIONS.

MINNIE MOORE ELECTION.

Charles M. Schwab Now Controls Board Of Directors. The annual meeting of the stockhold-

The annual meeting of the stockholders of the Minnie Moore Mining company, operating at Hailey, Ida., was held in Chicago yesterday and a board of directors consisting of Joseph E. Schwab, Irving E. Rockwell, M. R. Warde, Ben A. Smith and J. C. Nivin, was elected.

Mention was made in the columns of the "Naws" recently of the purchase

Mention was made in the columns of the "News' recently of the purchase of a control in this mine by Charles M. Schwab, ex-president of the steel trust, and this was the first meeting of shareholders in which he was a par-ticipant. He was represented by a brother, Joseph E. Schwab.

WORK ON THE HANNAPAH.

Good Ore Encountered in North Crosscut on the 250 Level.

Supt. Frank B. Work of the Hannah-Supt. Frank B. Work of the Hannahpah mine reports that some good ore
has been encountered in the north
crosscut on the 250 level, about 275 feet
from the shaft. A 10-inch streak on
the hanging-wall carries good values
and shows small spots of ruby silver.
On the footwall there is a streak varying from 12 to 18 inches which shows
good milling values. The indications
are that the crosscut is nearing the
dike, where the management expects to dike, where the management expects to secounter a large body of good ore. Good progress is being made and an important strike is likely to be reported at any time. The flow of water remains at about 12,000 gallons a day. The east and west drifts on the 350

level of the MacNamara are each out about 35 feet, and both faces continue in a good quality of milling ore. The incline on the vein from the 350 level is down 30 feet, and the ore is of the usual grade, with some streaks that cary very high values. The crosscut to the south from the 500 station is out about 100 feet. During the week there was a decided change for the better, the porphyry having sofetend up and now showing some quartz. Considerable quantities of ore of a good grade are being placed on the dumps.—Tenopah Miner.

LEAD MERGER COMPLETED. The National Takes Over the United Company.

A New York dispatch says: The protracted negotiations for a merger of the National Lead company and the United Lead company have been successfully concluded, according to the statements in official quarters today. The former company will absorb the latter, the details to be carried out in the fall.

The agreement reached today will be subject to ratification by directors and stockholders of the companies, but it is understood that dominant interests n both properties have signified their approval of the preliminary agreement. So far as can be learned the scheme provides for an increase in capital stock of the National Lead company for the purpose of absorption.

purpose of absorption.

The present total capital of the National Lead company is \$30,000,000. The United Lead company has not distributed any stock, although its capital is \$15,000,000 with a bond issue of \$9,500,000.

The matter was settled at a confer-The matter was settled at a conter-ence between Daniel Guggenheim, rep-resenting the United Lead company, and L. A. Cole, president of the Nation-al Lead company.

al Lead company.

Another question considered was the supplying of raw material to the National Lead company on terms that would be satisfactory to the lead company and to the American Smelting company, as the new company will buy raw material from the smelting com-pany in the shape of pig lead, aggre-gating from 150,000 to 200,000 tons a

SALT LAKERS IN NEVADA. New District Near Sodavillo is Attracting Attention.

W. R. Smith, who is working the Contact property near Sodaville, Nev., under a bond and lease, has returned from the west for the purpose of meeting with the owners of the ground in hopes of getting them to grant him an extension of time, which they will probably do. Mr. Smith says some very hard rock has been encountered and progress has been greatly retarded

Mr. Smith says considerable activity is being displayed in a mineralized belt located about six miles north of the Contact mine. A great deal of locating of claims has been done there this year and the locators have been busy doing their assessment work. Mr. Smith secured a group himself and is as confident as anyone can be that he has stumbled onto something pretty good.

A. H. Mayne and G. G. Hail, who are well known to the mining fraternity of this city, joined in the rush and have secured a foothold on the new camp. Mr. Mayne, who is working the Goldsmith group near the Contact, is sacking ore for shipment and will soon report in the local market. Mr. Smith says considerable activity

SAMPLER FOR TONOPAH.

One in Nevada Camp.

The Taylor & Brunton Sampling company, which has mills scattered over Colorado, Utah and Montana, has decided to compete with the Western Ore Purchasing company at Reno for Tono-

pah business.

T. R. Woodbridge, formerly manager of the Victor, Colo., plants of the T. & B. company, has arrived in Tonopah to arrange for the construction of the new

arrange for the construction of the new plant and work up a clientage.

The Tonopah Miner notes his arrival in the Nevada camp in the following:

"T. R. Woodbridge, representing Taylor & Brunton of Denver, who operate a number of the most important sampling works in the west, arrived last Monday, and announces that his company will at once establish sampling works at Tonopah or in the immediate vicinity. Mr. Woodbridge is accompanied by his wife and will make his permanent headquarters in Tonopah."

SALT LAKE THE CENTER.

Trade Formerly Controlled by San Franelsco and Denver Now Comes Here.

Salt Lake is rapidly becoming recognized as a mining machinery center for the intermountain states. A few years ago San Francisco supplied the camps of Nevada: the mine owners of Idaho and Wyoming went to Denver Idaho and Wyoming went to Denver and eastern Oregon operators also had to send their orders either to Denver or Chicago. But it is different now. Salt Lake houses are supplying this trade. A great deal of the mine equipment in use at Tonopah came from this city or else the orders were taken by local representatives of eastern houses. A few days ago the management of the Black else the orders were taken by local representatives of eastern houses. A few days ago the management of the Black Pearl mine at Pearl, Ida., placed an order for a complete 100-ton concentrating mill with Curtis P. Mason, local representative of Fairbanks, Morse & Company, which includes four Ellspass mills slimers, etc. The plant is to be completed within 90 days, and will be provided with modern devices through. provided with modern devices throughout. The camp of Pearl is within 30 mlles of Boise.

A WEEK IN GOLDFIELD.

Salt Lake Broker Bonds Columbia Mountain Claims.

Despite the halt for the Fourth of July festivities this has been a week of great progress in Goldfield's mines. A stream of rich ore is headed towards th stream of rich ore is headed towards the smelters from the Jumbo and before the year is out the world's supply of gold money will be greatly added to from this property. On Tuesday 305 sacks of rich ore were shipped from the Kernick & Bowes lease and when smelter returns are received they will be convincing to any who may doubt the richness of the Jumbo.

Curris and Ridge also sent out a ship-

convincing to any who may doubt the richness of the Jumbo.

Curtis and Ridge also sent out a shipment of 22 tons yesterday from their lease on the Jumbo, the value of which is little, if any, below that sent from Kernick & Bowes' lease. Forty men are employed on this lease and they are doing some tall hustling. In 21 days the new working shaft has been sunk 105 feet and has bene connected with the old Harvey shaft at the 50-foot level. The lessees will connect the two shafts every 50 feet and they are now drifting both ways on the 50-foot level.

Attorney Vermilyea has returned from Bishop and resumed his work with the chisel on the rich ore in his lease. Charles L. Richards, district attorney of Nye county has bought a third in-

Charles L. Richards, district attorney of Nye county, has bought a third interest in the Price and Currie lease from C. A. Baldwin. Machinery will soon be placed on this lease and the ore gone after in a vigorous manner.

McDonald, Court and Shields have given an option to a Salt Lake broker on a group of claims east of Columbia mountain.

Price & Currie have started a shaft on their Clermont lease and expect to soon get into pay ground. Two shifts will be put on and work rushed.

NEWFOUNDLAND A COPPER CAMP.

The Boston & Terrace Mine Ready To Begin Regular Shipments To the Local Markets.

MANACER BIRCHARD IS HERE.

Mine Located on Line of Lucin Cut-Off, on West Side of Great Salt Lake.

That the New Foundland mining disrict, located on the west side of the Great Salt Lake on the line of the Lucin cut-off, is one of the coming copper camps of the state is confidently believed by C. T. Birchard of Boston, the manager of the Boston & Terrace prop-

Mr. Birchard is in the city today having just returned from a trip of inspection to the mine and is arranging for the shipment of ore just as soon as the railroad opens the "cut-off" for local traffic. "We are ready to ship," said Mr. Birchard today, and have been since the first of January. We are now simply waiting on the railroad. In the meantime development work is progressing favorably. Our property is being opened by tunnels and the main one has been completed to the length of 1,089 feet. We are now making an up-I,089 feet. We are now making an upraise to the surface for air." Mr. Birchard explained that this tunnel has tapped a 2½-foot body of high grade ore, which is now being extracted for shipment. Several hundred sacks will be sent out to the mine at once to be filled, so that by the time of the railroad is ready for business the product can be moved out without any upduct can be moved out without any unduct can be moved out without any un-necessary delay. A sample lot of this ore was sent to a local assayer a few days ago, and the returns were most gratifying: the certificate indicating values of 18.9 per cent lead, 27 per cent copper, 87 ounces silver, and \$1.40 in gold.

A 500-pound sample of ore from the Boston & Terrace mine was sent with the Utah mineral exhibit to the St. Louis fair.

The property is located about five miles from Newfoundland station on the "cut-off."

Grand Central Dividend.

The directors of the Grand Central Mining company met in Provo late yesterday afternoon and posted the July dividend of 10 cents a share, or \$25,000 The amount is payable on the 15th inst The company's books close on the 12th

MINES MAY CONSOLIDATE.

Properties at Galena, Nevada-Shilo and Boston & Maine.

William A. Eckman, superintendent of the Boston & Maine property at Galena, Nevada, of which the late C. S. Richardson of this city was manager, is in the city today to confer with local shareholders with the purpose in view of laying before them a propsition to take over the White and Shilo group, an old time producer of the camp, which is owned by himself. In the White and Shilo, Mr. Eckman says, there are a great many thousands of tons of milling ore blocked out which could be made to yield a profit if facilities for treatment were provided. He believes he can show where it will be to the advantage of the Boston & be to the advantage of the Boston & Maine company to take hold of his property, for by doing so the company could commence producing at an early date, whereas, it would otherwise entail much expense as well as time to place the original Boston & Maine on a producing basis. It is probable that the proposition of Mr. Eckman will receive serious consideration and that Supt. John A. Kirby of the Daly-West mine at Park City will be delegated to conduct an examination of the prop-

erty.

There is plenty of water available in Physics Physics Since the camp for milling purposes. Since the death of Mr. Richardson the Boston & Maine has been closed.

CONCENTRATES.

Two cars of Tonopah ores reached the local sampling mills today, The Utah of Fish Springs has a car of ore at the samplers today.

Harry Joseph is inspecting the Silver Shield mine in Bingham today.

Yesterday was pay day at the Silver King and Daly-Judge mines at Park

R. G. Wilson has gone to San Francisco where he expects to remain until after the hot spell of weather.

Secretary Lambourne of the Daly-Judge company visited Park City yes-terday and disbursed the June pay-

D. W. Brunton, for many years chief consulting engineer for the Anaconda Copper Mining company in Montana, has resigned.

The ore and bullion settlements reported late yesterday were as follows: Crude ore and concentrates, \$43,200; base bullion, \$19,600.

Manager A. E. Hyde, Jr., who has been in the city several days, returned to the Annie Laurie mine in the Gold Mountain discrict today.

Samuel Newhouse departed for the east last night. He will stop a few days in Denver before proceeding to New York and thence to Europe.

At the delinquent sale of the May Day Mining company, held yesterday afternoon, about 20,000 shares went down under the hammer at the market Peter Porter returned this morning from a pilgrimage to Idaho in the in-terest of eastern clients. While away he examined a property in the Boise

The Ontario Silver Mining company expects to have the No. 3 shaft equipped for business again by the middle of August. The holsting plant at the Daly mine has been torn down and is being conveyed to the scene of the late fire.

Clarence Rae, the Chicago mining man who recently became interested in Beaver county, was called to Milford last night owing to the sudden death of his wife from heart failure. The re-mains will be shipped east for burial

accompanied by the bereaved husband !

Mr. J. E. Spurr of the United States geological survey will visit the Tonopah district. Nevada, some time during the summer, in order to make a final re-vision of his conclusions before pub-lishing the report on the Tonopah ore deposits on which he has been at work for the last year.

Mr. J. M. Boutwell of the United Mr. J. M. Boutwell of the United States geological survey will complete an investigation of the mining geology of the Park City district. Utah, during the present year. He will also make a reconnaissance of the areal, stratigraphic, and structural geology of the western portion of the Uinta mountains. Mr. Lester H. Woolsey will assist him.

The Emily Sliver Mining company of Utah filed articles of incorporation in the office of the county clerk yesterday. The company is capitalized at \$60,000 and will work the Emily claim at Alta. The officers are J. P. Henderson, president; Mortimer Fargo, vice-president; John F. Baster, treasurer, and C. F. Harris, secretary.

The areal and economic survey of Coeur d'Alene mining district, Idaho, will be completed by Dr. F. L. Ran-some of the United States geological survey during the present year, it deposits. Such reconnaissance examinations of the adjoining regions as may be deemed necessary will be made. Mr. C. Calkins will assist Dr. Ransome in

MARKET WAS FAIRLY ACTIVE.

Some Large Blocks of Prominent Stocks Changed Hands, Brordening Mraket.

TRADERS TOOK THEIR PROFITS.

Effect Was to Make Things Dull, but There Soon Was Renewed Activity.

New York, July 12.-Opening prices fractional advances over last night. Some large blocks of the prominent stocks changed hands and the market was broad and active. Profit taking sales followed the opening rise and the market yielded slightly and became dull A rise of Reading of 11/8 helped the market. Brooklyn Transit lost % and Anaconda 14. The market was dull and heavy again at noon.

Bonds were irregular at noon. Minor stocks figured more prominently in the midday dealings than for some time. The general market also developed renewed activity at higher prices.

renewed activity at higher prices.

Buying ceased rather abruptly after a rise in the coalers and speculation for a time became quiet and uninteresting. Toward 2 o'clock St. Paul, Union Pacific and Metropolitan Street Railway were carried up over a point, and the United States Steel stocks came into demand, the preferred rising 1. Reading extended its rise to 1%.
